

## *Scrims and Ladders: User Manual*

### **Signing Up / Logging In:**

#### *New Users:*

Once reaching the Scrims and Ladders website, you start by clicking the “SIGN UP” button and will then be asked to create a profile to have access to our team builders. There is a brief page with some requirements and statistics to enter. You must provide a unique username, preferably the same as your summoner name on League of Legends to expedite the process of adding teammates to get right into playing. Then, create a password to keep your account safe. You will provide if you are using our service as a player, coach, or manager. For beginner players, it is strongly recommended that you sign up as a player. Then, you enter your current rank, preferred in-game role, and division. Once you have all sections of the initial survey, you click “SIGN UP” and you have now entered the database and will be assigned a team.

#### *Recurring Users:*

Once reaching the Scrims and Ladders website, click “LOG IN” and enter your username and the password you created to get started.

### **Navigating the Pages:**

On the Scrims and Ladders website, once logged in, there will be buttons on the top of the screen. The buttons will bring you to a new page, each having its own purpose for the user.

*About:* The About page gives you a quick briefing into the motivation behind the Scrims and Ladders project.

*FAQ:* The FAQ page answers questions users may have about our service and purpose.

*Support:* Brings you to a hyperlink to address Scrims and Ladders staff about any questions, comments, and concerns regarding our service.

*Team:* This brings you to a page with your teammates and coaches on it.

*Profile:* On the Profile page you can see all of your information regarding your role on the team. You stats can be changed.

**Your New Team:**

On the Team page, you will be able to see your teammates, coach, and manager. This is where you go to meet your team for the first time. Your username should be made the same as your summoner name on League of Legends. Then in League, add your new teammates, coach, and manager to get started.

**Change your Player Information:**

Once you are signed in and on the Profile page, you can change your current information by pressing the "EDIT PROFILE" button. Here you have the option to change any of the information from what you had previously to what suits you now.

**Create a Team:**

If you are signed on as a coach or manager, you are now ready to create a team simply by pressing "CREATE A TEAM" button. Scrims and Ladders will reach into our player database and create a balanced team with players at every position available. Teams may not be filled out right away but once the matches come into our database, they will be assigned to your team.
